

HIAB TRAINING COURSE

Luft Training Services are an Independent forklift truck training centre. We train operators on, Counterbalance, Reach, Bendi, Side Loaders, rough terrain telescopic, electric and manual pallet truck, Hiab Training plus many more.

Hiab training is not in any way an option for companies operating Hiabs. Regulations require all employers to take reasonable steps to ensure the safety among their employees, but courts are always going assign liability to managers and companies who fail to ensure their workers have been correctly trained and hold the appropriate certification.

Hiab Training is available to businesses and individuals across West Sussex and East Sussex to include Chichester, Bognor Regis, Littlehampton, Worthing, Lancing, Hove, Brighton and all surrounding areas. If you are not sure if we cover your area please call us or use our contact form page as member of the team are always happy to assist you.

ABOUT THE HIAB TRAINING COSTS

It's a well-known fact that there are companies out there which offer Hiab Training courses on a pay monthly cost, this involves signing up for finance and usually incurs a very high interest rate and in some cases a deposit.

Normally these companies do not train their pupils direct and ultimately request quotes from companies like us. At Luft Training Services our Hiab Training costs are both competitive and low so you can afford to go direct.

HIAB Types:	Standard Hook
	Fassi
Makes & Models:	XCMG

HIAB Course Description

HIAB training courses teach drivers to load and offload the platform to which the HIAB crane is attached; commonly a lorry hence the name *Lorry Mounted Loader*. **Lorry Loader training** is available on other HIAB setups including handling machinery for ships and ports or fixed position cranes. A **HIAB course** can be delivered on any client site.

Lorry Mounted HIABs usually draw from the lorry's engine to power the hydraulic pumps. **HIAB training** teaches fundamental knowledge beneath the surface of driver / operator controls. Candidates on HIAB training courses learn safety and responsibility gaining a deep understanding of HIAB crane operation.

Successful **Lorry Loader course** candidates receive a *HIAB operator license* in the form of an *operator certificate* and *photo ID card*.
